

# Collect.IXVals Function

## Description

Returns the list of index values for the specified indexed field in the specified file.

## Syntax

list = **Collect.IXVals** (filename, fieldname)

## Parameters

The Collect.IXVals function has the following parameters:

Parameter	Description
<i>Filename</i>	Name of the OpenInsight table containing the index
<i>Fieldname</i>	Name of the indexed field. If the field is a cross reference, suffix with _XREF.

## Returns

An @fm delimited list of index values.
