

Get_SI_Values Routine

Description

Returns all indexed values from the index for a column.

Syntax

Get_SI_Values (*tablename*, *columnname*)

Parameters

The Get_SI_Values routine has the following parameters.

Parameter	Description
<i>tablename</i>	The name of the table to search.
<i>columnname</i>	The name of the column to search.

The Get_SI_Values routine should only be used from the command line. Use Collect.IXVals() in a BASIC+ script to accomplish the same result.
