

# Inet\_FormLoad Function

## Description

Internet procedure that retrieves an HTML form from the repository and fills it in with default form values.

## Syntax

```
return = Inet_FormLoad(Request)
```

## Parameters

Parameter	Description
<i>Request [in]</i>	HTTP-request that carries the following parameter: <i>FORM_ID</i> - name of a form published by HTML Publisher  This function is analogous to a call to <a href="#">Start_Window(formID)</a> for a database bound form. For a non-bound form, its nearly identical to the Internet procedure <a href="#">Inet_Repos()</a> .

## Returns

HTML representation of the OpenInsight form.

## Example

To launch a form **WEB\_REPORT\_DEMO** published using the Web Publisher, submit a URL similar to the following:

```
http://127.0.0.1/cgi-bin/oecgi.exe/INET_FORMLOAD?FORM_ID=WEB_REPORT_DEMO
```
