Inet_FormWrite Function

Description

Internet procedure that retrieves data from an HTTP request and writes a row to native OpenInsight table(s). In a form, the names of the controls are matched with the OpenInsight column names when the row is written.

Syntax

return = **Inet_FormWrite** (*Request*)

Parameters

Parameter	Description
Request [in]	HTTP-request

Remarks

This function is analogous to a call to Send_Event(formID, "WRITE")

Example

To write a row from a HTML form to the **PRODUCTS** file, with the **ID=1-4235-24**, enter the URL similar to that shown below:

```
http://127.0.0.1/cgi-bin/oecgi.exe/INET_FORMWRITE?FORM_ID=PROD_ENTRY&ID=1-4235-24
```

where the name of each control in the form matches to the name of the OpenInsight column.

Returns

HTML representation of the OpenInsight form.
