

PrintRect Function

Description

Prints a rectangle relative to the page, beginning at the top left and extending to the bottom right coordinate of the rectangle measured in inches.

Syntax

status = **PrintRect** (*top, left, bottom, right*)

Returns

True for successful execution or **False** for failure.

Example

```
/* Sets the printer to draw a rectangle that measures  
2 inches x 4 inches. */  
RetVal = PrintRect(1, 1, 2, 4)  
return
```
