

RTI_GetNetworkUserName Function

Description

Returns the current network name of the user.

Syntax

```
network_user_name = RTI_GetNetworkUserName()
```

Returns

The current network name of the user.

Example

```
/* After the call to RTI_GetNetworkUserName(),
network_user_name will be assigned the name of the currently logged on user */

declare function RTI_GetNetworkUserName
network_user_name = RTI_GetNetworkUserName()
```
