

Save_Env Routine

Description

Saves the current environment settings.

Syntax

Save_Env (*database*)

Parameters

The Save_Env routine has the following parameter.

TParameter	TDescription
<i>database</i>	A name for the database, 1 to 8 characters in length. The database can contain upper case alphabetic characters, digits, or the underscore (_). If database is null, the current database is used.

Example

```
run Save_Env " "
```
