

ENABLED

Applies to

All controls, menu items.

Description

Allows a disabled control to issue an event, or disables a control.

Usage

enabledstatus = **Get_Property** (*objectname*, "ENABLED")

existingprop = **Set_Property** (*objectname*, "ENABLED", *state*)

Remarks

Values passed in Set_Property:

Value	Possible Values	Description
<i>State</i>	1	The control is available to the user at run-time.
	0	The control cannot receive focus and is displayed in a disabled manner.
	-1	The control cannot receive focus and is displayed in a disabled manner with the standard Windows graphical representation .

Returns

Values returned by both Get_Property and Set_Property:

Value	Description
<i>enabledstatus</i>	State of control.
<i>existingprop</i>	State of control when Set_Property was called.

Note: With the release of OpenInsight 7.0, the ENABLED property may be set to a -1. This will set the control's disabled look to a "Windows Disabled" look.
