

UNICODE_UTF8 Function

Description

Converts a UNICODE string to an UTF8 string.

Syntax

ansiString = **UNICODE_UTF8** (*uniCodeString*, *delimiter*)

Parameters

The function has the following parameters:

Parameter	Description
<i>uniCodeString</i>	The Unicode string to convert to UTF8. This string will contain two-byte Unicode characters.
<i>delimiter</i>	The minimum delimiter value to use in the conversion.

Returns

A string containing UTF8 characters.
