LOAD PICTURE Service

Description

Creates an OLE picture object via the OleLoadPicturePath or OleCreatePictureIndirect Windows API functions.

Note: This is a Windows only function.

Parameters

Parameter	Description
<object></object>	(Required) The path and file name of the picture to load.
Returnvalue	An OLE Dispatch interface pointer to the picture object.

Comments

You must use the Utility IUNKNOWN_RELEASE service on the returned pointer when you are finished with it.

Example

```
// Load a OLE Picture object
bmpFile = ".\bmps\somepic.bmp"
pPicture = Utility( "LOAD_PICTURE", bmpFile )
// Do something with the picture object
...
// Call it's release method
call Utility( "IUNKNOWN_RELEASE", pPicture )
```
