

# SRP\_Set\_Clipboard

Sets the plain text currently on the clipboard.

## Syntax

```
SRP_Set_Clipboard(Text)
```

## Remarks

The SRP\_Set\_Clipboard sets the clipboard text. It does the same thing as calling Set\_Property("CLIPBOARD", "TEXT", MyText) but without requiring the presentation server context. Thus, it is safe to use in OEngines running outside of OpenInsight.

## Examples

```
SRP_Set_Clipboard("Hello, World")
```
