

Methods

OLE control methods provide convenient one-time operations to developers. Unlike properties, whose values are persistent over the life of a control, methods represent actions that a control can perform. Often, methods will change the values of other control properties, so be sure to read the Remarks section of each method carefully. The following methods apply to the SRP ReportTable Control:

Method	Description	Version Introduced
AboutBox	Displays the control's about box.	
CheckAll	Checks all check boxes in a given column.	3.1.3
CollapseAll	Collapses all groups	
Delete	Deletes a single row from the table.	
ExpandAll	Expands all groups.	
FindString	Returns the first row whose item at the given column location contains the given prefix.	
Insert	Inserts new data filled rows into the record table.	
MoveColumn	Programmatically moves a column to a new position.	
MoveTo	Programmatically navigates the table.	
RecordToRow	Maps a record index to a row index.	
RowToRecord	Maps a row index to a record index.	
SelectAll	Selects all rows in the table.	4.0.0
ShowContextMenu	Displays a context menu at the given mouse point.	
UncheckAll	Unchecks all check boxes in a given column.	3.1.3
UnselectAll	Clears the current selection.	4.0.0
