

GetLastError

Returns the last known error.

Syntax

```
Error = SRP_Zip("GetLastError")
```

Returns

A message describing the nature of the error.

Remarks

Call this service whenever any of the other SRP Zip Utility services fails to provide expected results.

Example

```
// Test for errors
hZip = SRP_Zip("Open", TestZIP)
If hZip EQ 0 then
    Call Msg(@Window, SRP_Zip("GetLastError"))
end else
    SRP_Zip("Close", hZip)
end
```
