

RemoveFile

Removes a file from a zip file.

Syntax

```
Result = SRP_Zip("RemoveFile", ZipHandle, Index)
```

Returns

1 if successful, 0 if not.

Parameters

Name	Description
ZipHandle	Handle to an opened zip file.
Index	Index of the file to be removed.

Remarks

Call this service to remove a file from a zip file. The value of Index can be the value returned by [FindFile](#) or the same index used to reference the file in the value returned by [GetFileList](#).

Example

```
// Remove a single known file
hZip = SRP_Zip_Open("C:\MyFile.zip")
If hZip EQ 0 then
    Call Msg(@Window, SRP_Zip("GetLastError"))
end else
    FileIndex = SRP_Zip("FindFile", hZip, "MyImage.BMP")
    If FileIndex NE 0 then
        Data = SRP_Zip("RemoveFile", hZip, FileIndex)
    end
    SRP_Zip("Close", hZip)
end
```
