OpenInsight as a REST API Engine, What You Should Know

By: Don Bakke

Description: Virtually everyone who develops web applications has heard of REST APIs. Common questions you might ask are: Is REST just another buzzword? Should I care? How can this benefit my application or company? The short answers to these questions are: No; Yes; and, Come to this presentation and find out how REST can benefit you. In addition to explaining REST in easy to understand terms, we'll provide a survey of the REST concept and compare it to competing strategies, explaining why REST is important and why virtually every major tech company on the internet supports REST APIs. Then we'll provide you with the basic steps you'll need to create your own REST API engine using OpenInsight. This presentation is a must for serious app developers who want to leverage their OpenInsight skill set with web and mobile toolkits.
