

# AcceptWindowsLogin

## Description

Returns a True or False depending on whether the Windows login credentials (SSO) is accepted.

## Syntax

```
rv = Security_Services("AcceptWindowsLogin")
```

## Parameters

None

## Remarks

This flag will already have been set by the LoadPreferenceSettings service from the FrameWorks service module. This is called during the CREATE event of the main MDI Frame commuter module.

## Version

16.0.18
