

# BindToButton

## Description

Binds the command to the given button. Currently only supports SRP buttons.

## Syntax

```
rv = Command_Services("BindToButton", CtrlEntId, Command)
```

## Parameters

| Parameter        | Description  |
|------------------|--|
| <i>CtrlEntId</i> | The control to bind the command to, located on a form. |
| <i>Command</i>   | A valid command in the Commands database table.        |

## Version

16.0.18
