

DayOfWeekNames

The displayed day of week names.

Usage

```
Set_Property(OLECtrlEntID, "OLE.DayOfWeekNames", Array)
```

Values

Array has the following structure:

Pos	Name	Type	Description	Default
<1>	Sunday	Text	The display name for Sunday	Sunday
<2>	Monday	Text	The display name for Monday	Monday
<3>	Tuesday	Text	The display name for Tuesday	Tuesday
<4>	Wednesday	Text	The display name for Wednesday	Wednesday
<5>	Thursday	Text	The display name for Thursday	Thursday
<6>	Friday	Text	The display name for Friday	Friday
<7>	Saturday	Text	The display name for Saturday	Saturday

Remarks

The DayOfWeekNames property is a dynamic array of names for the days of the week, which you may customize for internationalization purposes. The array is in order from Sunday to Saturday. Simply set this array to the list of names you wish to use. Any blank field is ignored and that field's name remains unchanged.

Example

```
// Set days in Spanish
DayNames = "Domingo":@FM:"Lunes":@FM:"Martes":@FM:"Miércoles"
DayNames := "Jueves":@FM:"Viernes":@FM:"Sábado"
Set_Property(@Window:".OLE_DATEPICKER", "OLE.DayOfWeekNames", DayNames)
```
