

# GridSize

The number of visible months.

## Usage

```
Set_Property(OLECtrlEntID, "OLE.GridSize", Array)
```

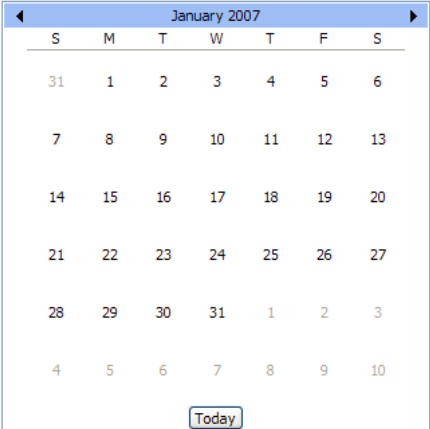

## Values

Array has the following structure:

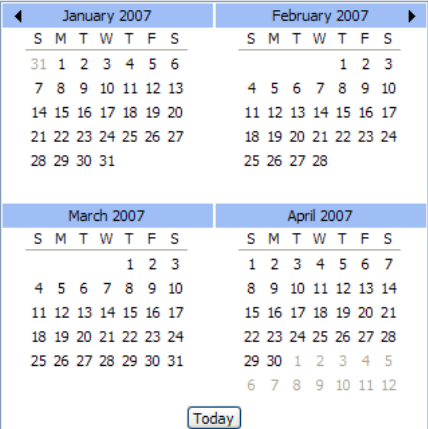

Pos	Name	Type	Description	Default
<1>	Columns	Integer	The number of columns	1
<2>	Rows	Integer	The number of rows	1

## Remarks

The GridSize property sets the number of visible months. The months are arranged in a grid pattern, that is, columns and rows. As such, this property has two fields: column count and row count. To customize the months, simply specify the columns and rows.

GridSize = 1 x 1

GridSize = 2 x 2

**This property has no effect if the Autosize is set to 1.**

## Example

```
// Set the months to 2 columns and 2 rows
Set_Property(@Window:".OLE_DATEPICKER", "OLE.Autosize", 0)
Set_Property(@Window:".OLE_DATEPICKER", "OLE.GridSize", 2:@FM:2)
```
