

MonthNames

The displayed month names.

Usage

```
Set_Property(OLECtrlEntID, "OLE.MonthNames", Array)
```

Values

Array has the following structure:

Pos	Name	Type	Description	Default
<1>	January	Text	The display name for January	January
<2>	February	Text	The display name for February	February
<3>	March	Text	The display name for March	March
<4>	April	Text	The display name for April	April
<5>	May	Text	The display name for May	May
<6>	June	Text	The display name for June	June
<7>	July	Text	The display name for July	July
<8>	August	Text	The display name for August	August
<9>	September	Text	The display name for September	September
<10>	October	Text	The display name for October	October
<11>	November	Text	The display name for November	November
<12>	December	Text	The display name for December	December

Remarks

The MonthNames property is a dynamic array of month names, which you may customize for internationalization purposes. The array is in order from January to December. Simply set this array to the list of names you wish to use. Any blank field is ignored and that field's name remains unchanged.

Example

```
// Set months in Spanish
Months = "Enero":@FM:"Febrero":@FM:"Marzo"
Months := "Abril":@FM:"Mayo":@FM:"Junio"
Months := "Julio":@FM:"Agosto":@FM:"Septiembre"
Months := "Octubre":@FM:"Noviembre":@FM:"Diciembre"
Set_Property(@Window:".OLE_DATEPICKER", "OLE.MonthNames", Months)
```
