

NoneButtonVisible

Shows or hides the None button.

Usage

```
Set_Property(OLECtrlEntID, "OLE.NoneButtonVisible", Boolean)
```

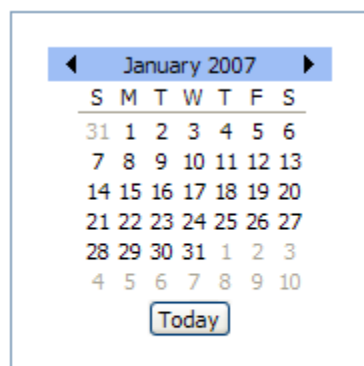

Values

[True | False]

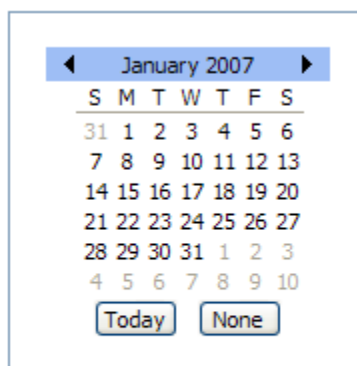

Default: False

Remarks

The NoneButtonVisible property is used to show or hide the None button. The None button provides a convenient means for removing the current selection.

NoneButtonVisible Off

NoneButtonVisible On

Example

```
// Show the None button  
Set_Property(@Window:".OLE_DATEPICKER", "OLE.NoneButtonVisible", 1)
```
