

RightToLeft

Determines if reading order is right-to-left.

Usage

```
Set_Property(OLECtrlEntID, "OLE.RightToLeft", Boolean)
```

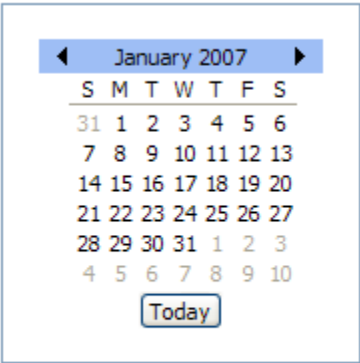

Values

[True | False]

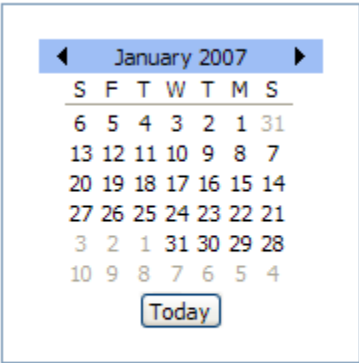

Default: False

Remarks

The RightToLeft property enables or disables right-to-left reading order. By default, this is disabled, but you can set this property to 1 to meet the needs of your international users.

RightToLeft Off

RightToLeft On

Example

```
// Enable Right-to-Left reading order
Set_Property(@Window:".OLE_DATEPICKER", "OLE.RightToLeft", 1)
```
