

Properties

OLE control properties are the primary means of interacting with OLE controls. Properties, much like OI control properties, describe the persistent attributes of the control, that is, attributes having some meaningful value for the entire life of the control. Like OI control properties, OLE control properties are manipulated using the `Get_Property` and `Set_Property` routines. The following properties apply to the SRP EditTable Control:

Property	Description	Version Introduced
ARRAY	The entire data contents of the table by field then record.	
AllowDeletions	Allows or prevents the user from using the delete key to delete records.	
AllowInserts	Allows or prevents the user from using the insert key to insert records.	
AutoColors	Automatic coloring of rows and columns.	
AutoNumbers	Automatic numbering of field and record headers.	
BlankRowManagement	Preferences for automatic adding/removing of bottom blank records.	
Border	The control's border style.	3.1.0
BorderColors	Customizes the colors of an SRP ActiveX Control's border.	3.1.0
BorderType	<i>Deprecated. Use Border instead</i>	<i>Deprecated</i>
Cancel	Cancels some edit table events.	
CellAlignment	The placement of a cell's contents.	
CellButtonEnabled	Establishes whether a cell's button is enabled or disabled.	4.0.1
CellCase	Forces a cell's text to UPPER or LOWER case.	
CellCheck	The state of a cell's check box.	
CellCheckEnabled	Establishes whether a cell's check box is enabled or disabled.	
CellColors	A cell's color scheme.	
CellComboData	A cell's combo box data.	
CellComboRowData	A cell's selected combo box row of data.	
CellComboSelPos	A cell's combo box selection.	
CellConv	A cell's validation and conversion settings.	
CellEditMode	Establishes a cell's behavior when selected.	
CellFont	The font used to render a cell's text.	
CellGridLines	Modifies a cell's gridlines.	
CellImage	A cell's image.	
CellImageLayout	Specifies how the image is laid out within the cell.	
CellMerge	Merges two or more cells.	
CellMultilined	Establishes whether a cell is single-lined or multi-lined.	
CellPadding	The number of pixels between a cell's edge and its contents.	
CellPrompt	A caption to appear within the cell, separate from the cell's contents.	
CellProtection	A cell's protection level.	
CellSelColors	A cell's color scheme when selected.	
CellSelPadding	The number of pixels between a cell's edge and its contents when it is selected.	
CellText	A cell's data.	
CellToolTip	Enables or disables a cell's tooltip.	4.1.20
CellType	The type of cell.	

ColumnData	An entire column's data.	
ComboDropDown	Shows or hides the selected cell's combo box dropdown.	
DataColumn	A data column's attributes.	
DataRow	A data row's attributes.	
DbClickToEdit	Whether or not double clicking an unprotected cell puts it into edit mode.	
DefaultCancelBehavior	The default Cancel property value.	
Dimension	Sets the number of columns and records	
EditContextMenu	Sets whether or not cells in edit mode show their default context menus during a right click or fire the OnClick event.	
EditSelection	The starting and end positions of the currently edited cell's selected text.	
EditText	The current text of a cell while in edit mode.	
Focus	The control's focus state	
FreezePos	The data cell prevented from scrolling.	
FunctionKey	Assigns an action to a function key.	
HANDLE	The table's window handle.	
HeaderAlignment	The placement of a header cell's contents.	
HeaderArrow	A header cell's sort arrow.	
HeaderColors	A header cell's color scheme.	
HeaderColumn	A header column's attributes.	
HeaderFont	The font used to render a header cell's text.	
HeaderImage	A header cell's image.	
HeaderMerge	Merges two or more header cells.	
HeaderMultilined	Establishes whether a header cell is single-lined or multi-lined.	
HeaderPadding	The number of pixels between a header cell's edge and it's contents.	
HeaderRow	A header row's attributes.	
HeaderRowCount	The number of header rows.	
HeaderText	A header cell's data.	
HeaderToolTip	A header cell's tooltip text	
HeaderType	The type of header cell.	
ImageList	A single bitmap containing all images used by the table.	
LIST	The entire data contents of the table by record then field.	
MinCellSize	The minimum possible size of rows and columns.	
Modified	The modified state of the current cell in edit mode.	
MultilineDelim	The delimiter to represent line breaks in cell text.	
NavKeyEnabled	Enables or disables default navigation keys.	
NewRowCount	The number of rows the user adds when tabbing from the last data filled row.	
PassEnterKey	Determines if the Enter key is passed to the OI window.	
ProgID	The control's ProgId/Class Name.	
QuickTabOut	The table's navigation behavior.	
RecordData	An entire record's data.	
Redraw	Enables or disables redrawing of the control when setting properties.	

ResetSelPos	Forces the SelPos back to the upper-left most selectable cell.	
RowsToRecords	Establishes a relationship between rows and records.	
ScrollBarsVisible	The visibility preference for the scroll bars.	
ScrollPos	The top-left most visible cell beyond the FreezePos.	
ScrollStep	The number of rows and columns to scroll at a time.	
SelPos	The currently selected cell.	
SelectionStyle	Sets the colors and style used to draw selected cells.	
ShowBorderGrid	The table's border-adjacent grid line behavior.	
ShowToolTips	Enables or disables the appearance of tooltips.	
SingleEscape	Determines when the Escape key is passed to OpenInsight	
SuppressMouseMoveEvent	Enables or disables the mouse move event.	
TextRenderStyle	The algorithm used to render text.	3.2.0
TitleList	The captions of all column header cells.	
ToolTipDelay	The time, in milliseconds, before an in-place tooltip appears.	
TrimOutput	Enables or disables the trimming of LIST and ARRAY data.	
Version	The control's version info.	
WorkspaceBkColor	The background color of the unoccupied space in the table.
