

# Methods

OLE control methods provide convenient one-time operations to developers. Unlike properties, whose values are persistent over the life of a control, methods represent actions that a control can perform. Often, methods will change the values of other control properties, so be sure to read the Remarks section of each method carefully. The following methods apply to the SRP EditTable Control:

Method	Description	Version Introduced
<a href="#">AbortCellEdit</a>	Sets the currently edited cell to Navigation mode.	
<a href="#">AboutBox</a>	Displays the control's about box.	
<a href="#">AddNewRecords</a>	Appends new records to the bottom of the edit table.	
<a href="#">Clear</a>	Removes all data leaving blank records.	
<a href="#">ClickOption</a>	Programatically clicks the option/combo button of a cell.	4.1.10
<a href="#">Copy</a>	Copies a cell's text to the clipboard.	
<a href="#">CopyAppearance</a>	Applies the appearance of one cell to one more other cells.	
<a href="#">CopyType</a>	Applies the appearance of one cell to one more other cells.	
<a href="#">Cut</a>	Copies a cell's text to the clipboard and removes it from the cell.	
<a href="#">DeleteColumns</a>	Permanently removes columns from the table.	
<a href="#">DeleteRecords</a>	Permanently removes records from the table.	
<a href="#">EditCell</a>	Programatically places a cell into edit mode.	
<a href="#">FireEvent</a>	Programmatically fires an edit table event.	
<a href="#">GetCellRect</a>	Retreives the size and position of a cell.	
<a href="#">HideBalloonTooltip</a>	Hides the visible balloon tooltip.	
<a href="#">INSERT</a>	Inserts new data filled records into the edit table.	
<a href="#">InsertColumns</a>	Inserts blank columns into the edit table.	
<a href="#">InsertRecords</a>	Inserts blank records into the edit table.	
<a href="#">Paste</a>	Moves text currently in the clipboard into a cell.	
<a href="#">Refresh</a>	Redraws the control.	
<a href="#">SaveScreenShot</a>	Saves a screenshot of the edit table to bitmap file.	
<a href="#">ShowBalloonTooltip</a>	Displays a balloon tooltip over a cell.	
<a href="#">ShowContextMenu</a>	Displays a context menu at the given mouse point.	3.0.1
<a href="#">Undo</a>	Undoes the last change made to the last cell.	
<a href="#">UpdateCellEdit</a>	Applies changes made in currently editing cell.
