Methods

OLE control methods provide convenient one-time operations to developers. Unlike properties, whose values are persistant over the life of a control, methods represent actions that a control can perform. Often, methods will change the values of other control properties, so be sure to read the Remarks section of each method carefully. The following methods apply to the SRP EditTable Control:

Method	Description	Version Introduced
AbortCellEdit	Sets the currently edited cell to Navigation mode.	
AboutBox	Displays the control's about box.	
AddNewRecords	Appends new records to the bottom of the edit table.	
Clear	Removes all data leaving blank records.	
ClickOption	Programatically clicks the option/combo button of a cell.	4.1.10
Copy	Copies a cell's text to the clipboard.	
CopyAppearance	Applies the appearance of one cell to one more other cells.	
CopyType	Applies the appearance of one cell to one more other cells.	
Cut	Copies a cell's text to the clipboard and removes it from the cell.	
DeleteColumns	Permanently removes columns from the table.	
DeleteRecords	Permanently removes records from the table.	
EditCell	Programatically places a cell into edit mode.	
FireEvent	Programmatically fires an edit table event.	
GetCellRect	Retreives the size and position of a cell.	
HideBalloonTooltip	Hides the visible balloon tooltip.	
INSERT	Inserts new data filled records into the edit table.	
InsertColumns	Inserts blank columns into the edit table.	
InsertRecords	Inserts blank records into the edit table.	
Paste	Moves text currently in the clipboard into a cell.	
Refresh	Redraws the control.	
SaveScreenShot	Saves a screenshot of the edit table to bitmap file.	
ShowBalloonTooltip	Displays a balloon tooltip over a cell.	
ShowContextMenu	Displays a context menu at the given mouse point.	3.0.1
Undo	Undoes the last change made to the last cell.	
UpdateCellEdit	Applies changes made in currently editing cell.
