

Events

OLE control events provide a way for the OLE control to communicate back to OpenInsight. Once an event has been qualified using OI's QUALIFY_EVENT message, then the OLE control will fire the event to OpenInsight allowing you to respond to any one of the control's predefined actions. Some events allow you to stop certain actions before they occur, so be sure to read the Remarks section of each event carefully. The following events apply to the SRP EditTable Control:

Event	Description	Version Introduced
AfterDeleteRecords	Fired after the user deletes a record.	
AfterInsertRecords	Fired after the user inserts a record.	
AfterNewRecords	Fired after the user creates new records at the end of the table.	
AfterUpdate	Fired after a cell's contents has been updated.	
BeforeDeleteRecords	Fired before the user deletes a record.	
BeforeEdit	Fired just before a cell goes into edit mode.	
BeforeInsertRecords	Fired before the user inserts a record.	
BeforeNewRecords	Fired before the user creates new records at the end of the table.	
BeforeUpdate	Fired before a cell's contents is updated.
