

OnClick

Fired when the user clicks on the button.

Parameters

Parameter	Description
Point	Mouse cursor location relative the control's top left corner
Button	The button pressed during the click
Shift	Indicates whether or not the SHIFT key is down
Ctrl	Indicates whether or not the CTRL key is down

Remarks

The OnClick event is fired when the user clicks the button.

The Point parameter contains the mouse cursors coordinates relative to the upper left corner of the control. It contains the x and y positions delimited by a comma, e.g, "100,100".

The Button parameter indicates the button that is used to fire the click event. This value is "Left" if the left mouse button was pressed, "Middle" if the middle mouse button was pressed, or "Right" if the right mouse button was pressed. Special values are passed when the button is "clicked" in other ways. If a default button was executed by pressing the enter key, then "Enter" is passed. If a button was executed by pressing the corresponding key combination (e. g, Alt+K), then "Accelerator" is passed.

The Shift and Ctrl parameters indicate whether or not the SHIFT or CTRL keys, respectively, were pressed when the event was fired. If either key was pressed, then its corresponding parameter will have a value of 1.
