CellCase

Forces a cell's text to UPPER or LOWER case.

Usage

```
Set_Property(OLECtrlEntID, "OLE.CellCase[field; record]", OptionValue)
```

Values

OptionValue can be set to one of the following valid options:

Value	Abbr.	Description
None	N	No case is forced
Lower	L	Force the cell's text to be lowercase
Upper	U	Force the cell's text to be uppercase

Default: None

Indices

Index	Description
field	Index to an existing field
record	Index to an existing record

Remarks

The CellCase property can be used to force a cell or group of cell's to be uppercase or lowercase.

Due to the inherent nature of Windows Edit Lines, a user can successfully paste text of any case into a cell when in edit mode.
