

CellCheck

The state of a cell's check box.

Usage

```
Set_Property(OLECtrlEntID, "OLE.CellCheck[field; record]", Boolean)
```

Values

[True | False]

Default: False

Indices

Index	Description
field	Index to an existing field
record	Index to an existing record

Remarks

The CellCheck property provides a way to get and set the check box state within a cell. This property is only valid for cell's whose CellType property has been set to "Check Box."
