

CellFont

The font used to render a cell's text.

Usage

```
Set_Property(OLECtrlEntID, "OLE.CellFont[field; record]", FontArray)
```

Values

The *FontArray* structure uses the same formatting as the OpenInsight FONT property. Visit the [Font](#) common OLE property page for further documentation.

Default: Tahoma, 8 pt.

Indices

Index	Description
field	Index to an existing field
record	Index to an existing record

Remarks

The CellFont property alters a cell's font.
