

# HeaderAlignment

The placement of a header cell's contents.

## Usage

```
Set_Property(OLECtrlEntID, "OLE.HeaderAlignment[col; row]", Array)
```

## Values

Array has the following structure:

Pos	Name	Type	Description	Default
<1>	Vertical Alignment	Option	Vertical placement of a header cell's contents	Center
<2>	Horizontal Alignment	Option	Horizontal placement of a header cell's contents	Left
<3>	Image Alignment	Option	Image placement relative to a header cell's text	Left

## Indices

Index	Description
col	Index to an existing header column
row	Index to an existing header row

## Remarks

The HeaderAlignment property aligns text and images along any edge of a header cell. This multivalued property has three fields: vertical alignment, horizontal alignment, and Image Alignment. Possible values for vertical alignment are:

Value	Abbr.	Description
Top	T	Places contents along the top of the header cell
Center	C	Places contents in the vertical center of the header cell
Bottom	B	Places contents along the bottom of the header cell

Possible values for horizontal alignment are:

Value	Abbr.	Description
Left	L	Places contents along the left side of the header cell
Center	C	Places contents in the horizontal center of the header cell
Right	B	Places contents along the right side of the header cell

Possible values for image alignment are:

Value	Abbr.	Description
Left	L	Places image to the left of the text
Right	R	Places image to the right of the text
Top	T	Places image above the text
Bottom	B	Places image below the text
Watermark	W	Places image behind the text and saturates the image so it does not obscure the text

## Example

```
// Align the caption along the top left sides of header cell (1,1) with a watermarked image
Set_Property(@Window:".OLE_EDITTABLE", "OLE.HeaderAlignment[1; 1]", "Top:@FM:"Left":@FM:"Watermark")
```
