

HeaderFont

The font used to render a header cell's text.

Usage

```
Set_Property(OLECtrlEntID, "OLE.HeaderFont[col; row]", FontArray)
```

Values

The *FontArray* structure uses the same formatting as the OpenInsight FONT property. Visit the [Font](#) common OLE property page for further documentation.

Default: Tahoma, 8 pt.

Indices

Index	Description
col	Index to an existing header column
row	Index to an existing header row

Remarks

The HeaderFont property alters a header cell's font.
