ScrollBarsVisible

The visibility preference for the scroll bars.

Usage

```
Set_Property(OLECtrlEntID, "OLE.ScrollBarsVisible", Array)
```

Values

Array has the following structure:

Pos	Name	Type	Description	Default
<1>	Vertical ScrollBar	Option	Vertical ScrollBar Visibility Preference	Auto
<2>	Horizontal ScrollBar	Option	Horizontal ScrollBar Visibility Preference	Auto

Remarks

The ScrollBarsVisible property can be used to establish when the scroll bars appear. Each scroll bar can have one of the following visibility preference:

Value	Abbr.	Description
Auto	A	ScrollBar appears only when necessary
Always	AL	ScrollBar is always visible, but disabled when no scrolling is necessary
Never	N	ScrollBar is never visible, but the user can still scroll using the navigation keys or the mouse wheel

This property is useful for syncronizing tables or aligning multiple OLE EditTables.

Example

```
// Never show the scrollbars
Set_Property(@Window:".OLE_EDITTABLE", "OLE.ScrollBarsVisible", "Never":@FM:"Never")

// Always show the scrollbars
Set_Property(@Window:".OLE_EDITTABLE", "OLE.ScrollBarsVisible", "Always":@FM:"Always")

// Always show the verticle scrollbars of two syncronized tables,
// but never show the horizontal bar for the first table
Set_Property(@Window:".OLE_EDITTABLE_1", "OLE.ScrollBarsVisible", "Always":@FM:"Never")
Set_Property(@Window:".OLE_EDITTABLE_2", "OLE.ScrollBarsVisible", "Always")
```
