Events

OLE control events provide a way for the OLE control to communicate back to OpenInsight. Once an event has been qualified using OI's QUALIFY_EVENT message, then the OLE control will fire the event to OpenInsight allowing you to respond to any one of the control's predefined actions. Some events allow you to stop certain actions before they occur, so be sure to read the Remarks section of each event carefully. The following events apply to the SRP Panel Control:

Event	Description	Version Introduced
OnGotFocus	Fired when the control receives input focus.	3.1.0
OnHScroll	Fires when the user scrolls the panel horizontally.	
OnLostFocus	Fired when the control loses input focus.	3.1.0
OnMouseEnter	Fired when mouse enters the control.	3.1.0
OnMouseExit	Fired when the mouse leaves the control.	3.1.0
OnParentClosing	Fired just before the parent form closes.	4.0.0
OnVScroll	Fires when the user scrolls the panel vertically.
