

Events

OLE control events provide a way for the OLE control to communicate back to OpenInsight. Once an event has been qualified using OI's QUALIFY_EVENT message, then the OLE control will fire the event to OpenInsight allowing you to respond to any one of the control's predefined actions. Some events allow you to stop certain actions before they occur, so be sure to read the Remarks section of each event carefully. The following events apply to the SRP Ribbon Control:

Event	Description	Version Introduced
OnCommand	Fired when a user executes a command by clicking a button.	3.2
OnCheckBoxCheck	Fired when a user checks or unchecks a check box control.	3.2
OnComboSelChange	Fired when a user selects an item in a combo box control.	3.2
OnDateFieldChange	Fired when a user selects a date in the date field or types in a new date.	3.2
OnEditFieldLostFocus	Fired when a user exits an edit field control.	3.2
OnGroupOptionClick	Fired when a user clicks on a group's option button.	3.2
OnMinimizeChange	Fired when the ribbon minimizes or maximizes.	4.0
