

Methods

OLE control methods provide convenient one-time operations to developers. Unlike properties, whose values are persistent over the life of a control, methods represent actions that a control can perform. Often, methods will change the values of other control properties, so be sure to read the Remarks section of each method carefully. The following methods apply to the SRP ShortcutBar Control:

Method	Description	Version Introduced
AboutBox	Displays the control's about box.	
Clear	Removes all groups and items from the control.	
ClearGroup	Removes all items from a group.	
EmbedWindow	Embeds a window within a group	
EnsureVisible	Scrolls an item into view.	
InsertGroup	Inserts a new group into the control.	
InsertItem	Inserts a new item into an existing group.	
RemoveGroup	Removes a group from the control.	
RemoveItem	Removes an item from a group.	
ShowContextMenu	Displays a context menu at the given mouse point.
