

Properties

OLE control properties are the primary means of interacting with OLE controls. Properties, much like OI control properties, describe the persistent attributes of the control, that is, attributes having some meaningful value for the entire life of the control. Like OI control properties, OLE control properties are manipulated using the `Get_Property` and `Set_Property` routines. The following properties apply to the SRP Subclass Control:

Property	Description	Version Introduced
AutoFill	Enables or disables autofill in combo boxes.	4.1.19
AutoFillListBox	Links a subclassed edit line to a list box for autocompletion.	4.1.19
Combo	Creates, removes, or updates a combo box drop down.	
ComboData	A control's combo box drop down data.	
ComboDropDown	Shows or hides control's combo box drop down.	
ComboRowData	A control's selected combo box drop down row data.	
ComboSelPos	A control's combo box drop down selection.	
CurrentWindow	The current window whose subclassed controls are being manipulated.	
CustomColors	Customizes the colors of a subclassed editline.	3.0.7
EditMask	Establishes a mask for allowing only valid data.	
MdImage	An image to display in the center of the MDIClient control.	4.1.6
MdiTheme	The theme used to render the MDIClient and its child windows.	4.1.6
MouseWheelDisabled	Enables or disables mouse wheel scrolling.	
OptionButton	Shows or hides an option button.	
OptionEnabled	Enables or disables an option button.	
OptionImage	The option button's image.	
OptionOnFocus	Indicates whether or not the option button disappears when the control loses focus.	
ProgID	The control's ProgId/Class Name.	
Prompt	The control's prompt.	
SpinButton	Shows or hides a spin button.	
SpinRange	The numerical limits of a spin button.	4.0.0
Version	The control's version info.
