

HideBalloonTooltip

Hides the visible balloon tooltip.

Syntax

```
rv = Send_Message(Ctrl, "OLE.HideBalloonTooltip")
```

Remarks

The HideBalloonTooltip method can be used to programmatically hide the currently visible balloon tooltip. There are no parameters. Since the control can only show one tooltip at a time, this method will know how to hide it.

Example

```
// Hide the balloon tooltip  
rv = Send_Message(@Window:".OLE_EDITTABLE", "OLE.HideBalloonTooltip")
```
