

# HyperFont

The font used to render the hyperlink caption when the mouse is over the text.

## Usage

```
Set_Property(OLECtrlEntID, "OLE.HyperFont", FontArray)
```

## Values

The *FontArray* structure uses the same formatting as the OpenInSight FONT property. Visit the [Font](#) common OLE property page for further documentation.

**Default:** Tahoma, 8 pt., Underline

## Remarks

The HyperFont property represents the caption's font when the mouse is over the text.
