

Background

The panel's background color fill.

Usage

```
Set_Property(OLECtrlEntID, "OLE.Background", ColorFill)
```

Values

ColorFill can be any [Color Fill](#) value.

Remarks

The Background property establishes the background color for the panel.

Like all [Color Fill](#) properties, you can set the background to a gradient. However, embedded controls such as labels and group boxes are not transparent. For best results, use a single color for the background and set all other controls' BACKCOLOR properties to that same color as necessary.

Example

```
// Set the background color to white
Set_Property(@Window:".OLE_PANEL", "OLE.Background", "White")
```
