

Left

The position of the horizontal scrollbar.

Usage

```
Set_Property(OLECtrlEntID, "OLE.Left", Value)
```

Values

Value can be any positive or negative whole number:

Default: 0

Remarks

The Left property determines the current location of the horizontal scrollbar. A value of zero indicates the scrollbar is all the way to the left.

Set this property to programmatically scroll the panel.

Example

```
// Get the current horizontal scroll position
LeftPos = Get_Property(@Window:".OLE_PANEL", "OLE.Left")

// Scroll 50 pixels to the right
Set_Property(@Window:".OLE_PANEL", "OLE.Left", LeftPos + 50)
```
