Alignment

The image alignment within the control's bounds.

Usage

```
Set_Property(OLECtrlEntID, "OLE.Alignment", Array)
```

Values

Array has the following structure:

| Pos	Name	Type	Description	Default
<1>	Vertical Alignment	Option	Aligns the image vertically along the top, center, or bottom of the control	Center
<2>	Horizontal Alignment	Option	Aligns the image horizontally along the left, center, or right of the control	Center

Remarks

The Alignment property aligns the image along any edge of the control. This multivalued property has two fields: vertical alignment and horizontal alignment. Possible values for vertical alignment are:

Value	Abbr.	Description
Top	T	Places image along the top of the control
Center	C	Places image in the vertical center of the control
Bottom	B	Places image along the bottom of the control

Possible values for horizontal alignment are:

Value	Abbr.	Description
Left	L	Places image along the left side of the control
Center	C	Places image in the horizontal center of the control
Right	R	Places image along the right side of the control

Use both fields to positoin the image anywhere within the control.

This property is ignored if the [Layout](#) property is set to anything other than "Clip".

Example

```
// Align the image to the control's top left sides
Set_Property(@Window:".OLE_PICTURE", "OLE.Alignment", "Top":@FM:"Left")
```
