

ImageOffset

The image offset within the control's bounds.

Usage

```
Set_Property(OLECtrlEntID, "OLE.ImageOffset", Array)
```

Values

Array has the following structure:

Pos	Name	Type	Description	Default
<1>	Vertical Offset	Integer	Offsets the image down a given number of pixels	0
<2>	Horizontal Offset	Integer	Offsets the image right a given number of pixels	0

Remarks

The ImageOffset property offsets the image by a given number of pixels. This multivalued property has two fields: vertical offset and horizontal offset. Each offset is an integer value. Positive values will move the image right and down while negative values move the image up and right.

The offset is applied after the image is positioned according to the [CaptionAlignment](#) is set.

This property is ignored if the Layout property is set to anything other than "Clip".

Example

```
// position the image 10 pixels from the top left
Set_Property(@Window:".OLE_PICTURE", "OLE.Alignment", "Top":@FM:"Left")
Set_Property(@Window:".OLE_PICTURE", "OLE.ImageOffset", "10":@FM:"10")

// position the image 10 pixels from the bottom right
Set_Property(@Window:".OLE_PICTURE", "OLE.Alignment", "Bottom":@FM:"Right")
Set_Property(@Window:".OLE_PICTURE", "OLE.ImageOffset", "-10":@FM:"-10")
```
