

OnVScroll

Fired when the user scrolls vertically.

Parameters

Parameter	Description
Position	The new scrollbar position

Remarks

The OnVScroll event is fired when the user moves the vertical scroll bar or scrolls using the mouse wheel. The new scrollbar position is provided via the Position parameter.

Example

```
Transfer Param1 to Position

// Synchronize with another control
Set_Property(@Window:".OLE_PICTURE2", "OLE.ScrollPos", @FM:Position)
```
