

# OnVScroll

Fired when the user scrolls vertically.

## Parameters

Parameter	Description
Position	The new scrollbar position

## Remarks

The OnVScroll event is fired when the user moves the vertical scroll bar or scrolls using the mouse wheel. The new scrollbar position is provided via the Position parameter.

## Example

```
Transfer Param1 to Position

// Synchronize with another control
Set_Property(@Window:".OLE_PICTURE2", "OLE.ScrollPos", @FM:Position)
```
