

Background

The color scheme used to render custom popups.

Usage

```
Set_Property(OLECtrlEntID, "OLE.Background", Array)
```

Values

Array has the following structure:

Pos	Name	Type	Description	Default
<1>	Popup Background	Color Fill	The background of the popup control	Auto
<2>	Hot Button Background	Color Fill	The background of button items when the user hovers over them	Auto
<3>	Pushed Button Background	Color Fill	The background of button items when the user clicks them	Auto

Remarks

The Background property is used when the [Theme](#) property is set to "Custom". This multivalued property defines the backgrounds used for the popup and it's buttons.

Popup Background

This field defines a [Color Fill](#) value used to render the entire popup control. Be default, this field is set to a two-part gradient based on the system select color.

Hot Button Background

This field defines a [Color Fill](#) value used to render button items when the user hovers over them. By default, this field is set to a two-part gradient based on the compliment of the system select color.

Pushed Button Background

This field defines a [Color Fill](#) value used to render button items when the user clicks them. By default, this field is set to a two-part gradient based on the compliment of the system select color.
