

Theme

The control's visual style.

Usage

```
Set_Property(OLECtrlEntID, "OLE.Theme", OptionValue)
```

Values

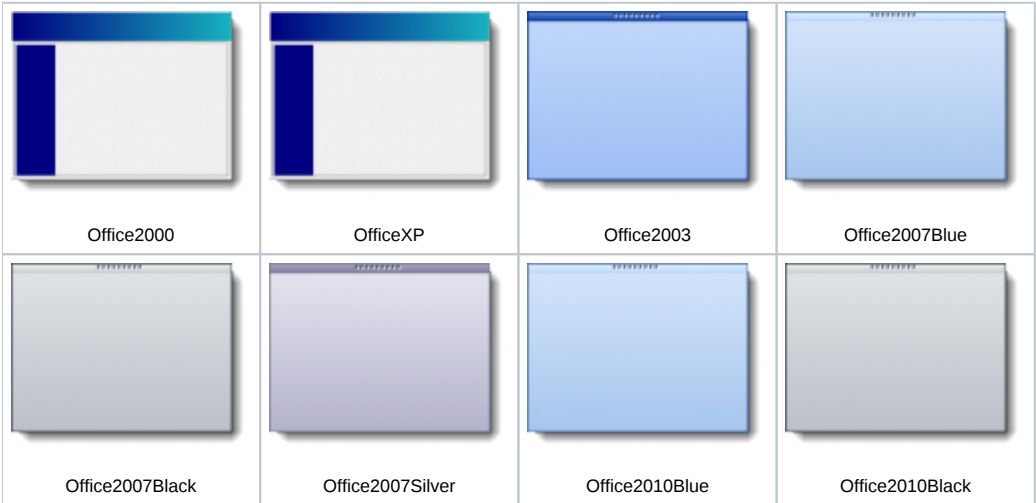

OptionValue can be set to one of the following valid options:

Value	Description
MSN	MSN Messenger theme
Office2000	MS Office 2000 theme
OfficeXP	MS Office XP theme
Office2003	MS Office 2003 theme
Office2007Blue	MS Office 2007 blue theme
Office2007Black	MS Office 2007 black theme
Office2007Silver	MS Office 2007 silver theme
Office2010Blue	MS Office 2010 blue theme
Office2010Black	MS Office 2010 black theme
Office2010Silver	MS Office 2010 silver theme
Windows7	Windows 7 theme
Office2013	MS Office 2013 theme
Custom	Custom Theme

Default: MSN

Remarks

The Theme property defines the control's visual style--how it is rendered. The built in themes are designed to emulate the look and feel of other well known applications. The "Custom" theme works with the [Background](#) property to create a look that is unique to your application.

Example

```
// Use the Office2003 theme
Set_Property(@Window:".OLE_POPUP", "OLE.Theme", "Office2003")

// Use a custom theme
Set_Property(@Window:".OLE_POPUP", "OLE.Theme", "Custom")
```
