

SRP_Color SRPStringToOI

Interprets an [SRP Color](#) and returns it as an OI color.

```
Color = SRP_Color("SRPStringToOI", String)
```

Returns

An OI color suitable for use in color based properties.

Parameters

Parameter	Description
String	The SRP Color String to interpret. (REQUIRED)

Remarks

The SRPStringToOI service interprets our [Color](#) technology that is widely used in the SRP ActiveX Controls and converts it into a Color that can be used in properties such as [BACKCOLOR](#) and [FORECOLOR](#).

Examples

```
ColorString = "3DFace L+=10"  
Color = SRP_Color("SRPStringToOI", ColorString)
```
