

SRP_Color SRPStringToHex

Interprets an [SRP Color](#) and returns it in '#rrggbb' format.

```
Hex = SRP_Color("SRPStringToHex", String)
```

Returns

The interpreted color in '#rrggbb' format.

Parameters

Parameter	Description
String	The SRP Color String to interpret. (REQUIRED)

Remarks

The SRPStringToHex service is a convenient combination of [SRPStringToOI](#) and [OIToHex](#). Helpful if you need to produce HTML compliant colors from our [Color](#) technology that is widely used in the SRP ActiveX Controls.

Examples

```
ColorString = "3DFace L+=10"  
Hex = SRP_Color("SRPStringToHex", ColorString)
```
