

ColumnAlignment

The alignment of the column's contents.

Version Introduced: 3.0.2

Usage

```
Set_Property(OLECtrlEntID, "OLE.ColumnAlignment[col]", OptionValue)
```

Values

OptionValue can be set to one of the following valid options:

Value	Abbr.	Description
Left	L	Aligns contents to the left
Center	C	Aligns contents in the center
Right	R	Aligns contents to the right

Default: Left

Indices

Index	Description
col	The index to a column in the report table

Remarks

The ColumnAlignment property determines the alignment of the data within that column. It does not affect the alignment of the column's header or footer. For those, use [ColumnHeaderAlignment](#) or [ColumnFooterAlignment](#) respectively.

Example

```
// Right align the third column
Set_Property(@Window:".OLE_REPORTTABLE", "OLE.ColumnAlignment[3]", "Right")
```
